Customer Service: support@mondex.pl

Thank you for purchasing our bathroom cleaning products. To ensure effective and safe use, please read the following guidelines on use and storage.

1. Safety during use

- **Keep away from children and animals:** Bathroom cleaning products should be stored out of the reach of children and animals to prevent accidental ingestion, inhalation or contact with the skin and eyes.
- **Avoid contact with skin and eyes:** Avoid direct contact of cleaning products with the skin and eyes. In case of contact, immediately rinse the area with plenty of water. If irritation persists, consult a doctor.
- **Use in well-ventilated rooms:** Bathroom cleaning products may give off fumes. Always use them in well-ventilated rooms to avoid inhaling harmful substances.
- **Follow the manufacturer's recommendations:** Use cleaning products in accordance with the instructions on the label. Never mix different chemical products, especially bleach and ammonia, as this may lead to the release of toxic gases.

2. Use

- **Types of surfaces:**
  - **Tiles and grout:** Use cleaning products designed to remove limescale, mould and soap scum from tiles and grout. To clean grout, use a product in spray or gel form, which penetrates hard-to-reach places. Leave the product on for a few minutes, then scrub the grout with a brush.
  - **Toilets:** Use dedicated toilet bowl cleaning products that remove limescale and disinfect surfaces. Apply the product under the rim of the bowl and leave it for a few minutes before brushing. Then rinse with water.
  - **Washbasins, baths and showers:** Use products that remove limescale, soap scum and cosmetic residues from ceramic, acrylic or enamelled surfaces. Spray the product onto the surface, leave it for a few minutes, then wipe with a damp cloth or sponge.
- **Applying the cleaning product:**
  - **Spray:** Spray the product directly onto the soiled surface or onto a cloth. Allow the product to work for a few minutes so that it effectively dissolves dirt, limescale or deposits. Wipe the surface with a clean, damp cloth.
  - **Liquid or gel:** Apply the liquid or gel to a damp cloth or sponge, then wipe the soiled surface. After cleaning, rinse the surface thoroughly with water to remove any residue of the cleaning product.

3. Maintenance and storage

- **Storage:** Store bathroom cleaning products in their original, tightly closed packaging, in a dry and cool place, away from sources of heat and direct sunlight.
- **Cleaning tools:** After using cleaning products, wash sponges, cloths and other cleaning tools thoroughly. Store them in a clean, dry place to prevent the growth of mould and bacteria.
- **Preventing limescale and deposits:** Regular use of cleaning products helps prevent the build-

up of limescale, mould and soap scum, which makes it easier to keep the bathroom clean and hygienic.

4. Final notes

- **Guarantee:** Our bathroom cleaning products are covered by a quality guarantee. If you discover manufacturing defects or problems with the product, please contact our customer service department.
- **Environmental protection:** Try to use cleaning products in accordance with the manufacturer's recommendations in order to minimise their impact on the environment. Consider using eco-friendly products that are safe for health and environmentally friendly.

Thank you for choosing our bathroom cleaning products. We hope they will provide effective and safe cleaning, helping to keep your bathroom clean and hygienic.
