# Instructions for Use: Bottles and Thermos Flasks

**Thank you for purchasing our bottle/thermos flask. To ensure long-lasting use and to maintain optimal insulating properties and hygiene, please read the following guidelines on use and care.**

## 1. Safe use

- **Avoid contact with fire:** Do not place bottles and thermos flasks near open flames or direct heat sources, to prevent damage or deformation.
- **Keep away from children:** Make sure that bottles and thermos flasks are used under adult supervision, especially when they contain hot drinks, to prevent scalds.
- **Use for the intended purpose:** Use bottles and thermos flasks only for their intended purpose. Avoid storing carbonated drinks in them, as the pressure may cause leakage or damage to the closure.

## 2. Use

- **Preparing the thermos flask before use:**
  - **Warming/Cooling:** For the best insulating performance, pour hot (not boiling) water into the thermos flask a few minutes before filling it with a hot drink. Similarly, for cold drinks, pour cold water or ice into the thermos flask to chill it.
  - **Filling:** Fill the thermos flask or bottle with the drink up to the recommended level, leaving some space so that it can be closed easily and to prevent leakage.
- **Using bottles:**
  - **Drinks:** Bottles can be used to store both cold and hot drinks. Before pouring in a hot drink, make sure that the bottle is suitable for contact with high temperatures.
  - **Drinking:** Open the bottle carefully, especially if it contains a hot drink, to avoid accidental scalding.
- **Using thermos flasks:**
  - **Long-term storage:** Thermos flasks are designed to keep drinks at an optimal temperature for a long time. Avoid opening the thermos flask too often, to minimise heat or cold loss.
  - **Closing properly:** Make sure that the thermos flask is tightly closed after each use, to prevent leaks and loss of the drink's temperature.

## 3. Care and maintenance

- **Cleaning:**
  - **Hand washing:** We recommend washing bottles and thermos flasks by hand in warm water with a mild detergent. Use a soft brush to clean the inside to remove deposits and drink residues. Avoid using abrasive sponges, which may scratch the surface.
  - **Cleaning lids and seals:** Clean lids, seals and other closure parts regularly to prevent the growth of bacteria and the formation of unpleasant odours. Make sure that all parts are thoroughly dried before reassembling.
- **Dishwasher washing:** Check the manufacturer's recommendations to see whether the bottle/thermos flask is suitable for washing in a dishwasher. If it is, place it on the top rack of the dishwasher to minimise the risk of deformation. However, hand washing is recommended in order to extend the life of the product.
- **Removing odours:** If the thermos flask or bottle has absorbed unwanted odours, try filling it with a solution of bicarbonate of soda and water, leave it for a few hours, and then rinse thoroughly.

## 4. Storage

- **Storage after use:** Store bottles and thermos flasks in a dry, well-ventilated place, preferably with the lid open, to prevent moisture from being trapped and mould from developing.
- **Protection against damage:** Avoid storing bottles and thermos flasks in places where they may be exposed to knocks or falls, which could damage the insulation or the closure.

## 5. Final notes

- **Warranty:** Our bottles and thermos flasks are covered by a quality warranty. If you discover manufacturing defects or any problems with the product, please contact our customer service department.
- **Environmental protection:** Choose reusable bottles and thermos flasks to minimise single-use waste and protect the environment. Proper care of these products allows them to be used for a long time.

**Thank you for choosing our products. We hope that our bottles and thermos flasks will accompany you for many years, providing convenient and safe storage of drinks on the go and in everyday life.**
